LOADING HS CODES

- 1. Open the application.
- 2. Connect the device Via USB to your computer/laptop.

- 3. Click on download HS list (This is done once to create the HS list).
- 4. Set the Serial Port COM and the Port Speed (By default the speed is 115200)
- 5. Click on program. The log will show the HS codes updating.
- 6. Close the application once done.

UPDATING FIRMWARE

1. Open the application and ensure the device is connected via USB

Version: Ver 2.00TRG03-TSL Serial Port Speed COM3 V 115200 V START Cance	Progress indicator			
COM3 ~ 115200 ~ START Cance	Version: Ver 2.00TRG03-TSL Serial Port Speed			
00	COM3 ~ 115200 ~	e	START	Cancel
	og			

- 2. Set the Serial Port and Speed.
- 3. Click on start
